

# 2022 IN REVIEW

2022 brought with it the worst humanitarian crisis that Pakistan had seen in a decade. 33 million people were affected and a health crisis of epic proportions arose among the wreckage. Your generosity allowed Indus Hospital & Health Network to take charge and serve people in this time of need.

This journey started with only a dream and now IHHN is a country-wide network that is robust enough to enter the field and make a significant impact during times of disaster.

Alongside flood relief efforts, your trust and generosity enabled IHHN to continue its day-to-day operations and achieved multiple significant milestones this year, which includes the treatment of **6 Million** patients in its hospitals and clinics across the country and the addition of a 14th hospital to the Network.

\*Jan-Nov 2022

Indus Hospital & Health Network managed to rise up during a nationwide crisis while also keeping its regular operations ongoing. None of this would have been possible without the support of people like you.

**Thank you for believing in us!**

**We look forward to your continued support in 2023!**
